

Deutsche Glasfaser FttH projects for MIH GmbH

Since beginning of 2016 LGCE has been cooperating with the German company MIH GmbH on the roll-out of the Fiber To the Home (FTTH) of Deutsche Glasfaser.

Our cooperation with MIH started in Schleswig-Holstein with the installation of the FttH network in Hartenholm. This project was executed in close cooperation, where the business relation between MIH and LGCE extended far more further than only supply of materials. LGCE and MIH focussed on product development and process optimisation to get the best and fastest result.

After this project MIH and LGCE continued their cooperation. MIH has grown to be one of the biggest and successful Installation Companies who are working on FttH networks for Deutsche Glasfaser and other project owners. For more information see: www.mih-gmbh.de

Up to now LGCE has been involved in the following FttH projects executed by MIH:

- Bark, Schleswig-Holstein
- Bevergen, Nordrhein-Westfalen
